IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re Application of: Sam H. Hay
Application number: 10/037,732
Filed: 11/09/2002
For: METHODS FOR DETERMINING BINOCULAR
      BALANCE AND DISORDERSOF BINOCULARITY
      OF AN INDIVIDUALOR CLINICAL GROUPS OF INDIVIDUALS
Docket no: HAYPAT7
GAU: 2625
Examiner: Choobin, Barry

PROPOSED AMENDMENT UNDER 37 CFR 1.116

This amendment is submitted as a proposed amendment for the Examiner's consideration.

Responsive to the final office action mailed 02/10/2006, Applicants respond as follows.

REMARKS

Claims 2 - 4, 8, 11, 12 and 15 are indicated as being allowable if rewritten in independent form. After careful review of the claims, Applicants believe incorporation of the limitations of claim 2 into claim 1 renders claim 1 allowable, making claims 3 - 13 also allowable. Similarly, the incorporation of claim 15 into claim 14 makes claim 14 allowable, as indicated by the Examiner. Claim 18 is also indicated as being allowable. Claims 2 and 15 - 17 are cancelled with this amendment.

As the application is now believed in condition for allowance,
